BRADLEY FIRE SUPPORT VEHICLE M7 BFIST SA (NSN 2350-01-572-5988) (EIC AP8)

VOLUME 1 OF 2

SUPERSEDURE NOTICE – TM 9-2350-439-23P-1 and TM 9-2350-439-23P-2 dated 30 November 2019 in conjunction with TM 9-2350-439-23 volumes 1-10 dated 30 November 2019 supersede TM 9-2350-439-23&P Vol 1-11 dated 31 May 2018.

DISTRIBUTION STATEMENT D – Distribution authorized to the Department of Defense and U.S. DoD contractors only due to Administrative or Operational Use - to protect technical or operational data or information from automatic dissemination under the International Exchange Program or by other means. This protection covers publications required solely for official use or strictly for administrative or operational purposes. This statement may apply to manuals, pamphlets, technical orders, technical reports, and other publications containing valuable technical or operational data, as determined on 20 Jan 2017.

WARNING – This document contains technical data whose export is restricted by the Arms Export Control Act (Title 22, U.S.C., Sec 2751, et. seq.) or the Export Administration Act of 1979 (Title 50, U.S.C., App. 2401, et seq.), as amended. Violations of these export laws are subject to severe criminal penalties. Disseminate in accordance with provisions of DoD Directive 5230.25.

DESTRUCTION NOTICE – For classified documents, follow the procedures in DoD 5220.22-M, National Industrial Security Program Operating Manual and/or DoDM 5200.01, Information Security Program. For unclassified, limited documents, destroy by any method that will prevent disclosure of contents or reconstruction of the document.

REPAIR PARTS AND SPECIAL TOOLS LIST INTRODUCTION

INTRODUCTION

SCOPE

This RPSTL lists the authorized spares and repair parts, special tools, special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of field maintenance of the Bradley FOV. It authorizes the requisitioning, issue, and disposition of spares, repair parts, and special tools as indicated by the source, maintenance, and recoverability (SMR) codes.

GENERAL

In addition to the Introduction work package, this RPSTL is divided into the following work packages:

1. **Repair Parts List Work Packages.** Work Packages containing lists of spare and repair parts authorized for use in the performance of maintenance at the levels determined by the MAC/SMR code. These work packages also include parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending Figure and item number sequence. Sending units, brackets, filters, and bolts are listed with the component they mount on. Bulk materials are listed by item name in the Bulk Items work package which follows KITS work package. Repair parts kits are listed separately in their own functional group and work package. Repair parts for reparable special tools are also listed in a separate work package. Items listed are shown on the associated illustrations.
2. **Special Tools Repair Parts Work Package.** This work package lists any spare parts required for the special tools, TMDE, or other support equipment listed in the Special Tools Work Package that are not listed in any other publication.
3. **Kits Work Package.** This work package lists all repair kits and their component parts.
4. **Bulk Items Work Package.** This work package lists all items identified as 'bulk' in the parts lists. Due to the nature of bulk items, this work package does not include a Figure.
5. **Special Tools List Work Packages.** This work package lists those special tools, special TMDE, and special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in the DESCRIPTION AND USABLE ON CODE (UOC) column). Tools that are components of common tool sets and/or Class VII are not listed.
6. **Cross-Reference Indexes Work Packages.** There are two cross-reference indexes work packages in this RPSTL. The National Stock Number (NSN) Index work package refers you to the Figure and item number for each NSN listed in the RPSTL. The Part Number Index work package refers you to the figure and item number for each part number listed in the RPSTL.

EXPLANATION OF COLUMNS IN THE REPAIR PARTS LIST AND SPECIAL TOOLS LIST WORK PACKAGES

ITEM NO (Column 1) Indicates the number used to identify items called out in the illustration.

SMR CODE (Column 2) The SMR code containing supply/requisitioning information, maintenance level authorization criteria, and disposition instruction in accordance with AR 700-82, as shown in the following breakout. This entry may be subdivided into 4 subentries, one for each service:

Table 1. SMR Code Explanation.

Source Code		Maintenance Code		Recoverability Code
XX		XX		X
1st two positions	How to get an item	3rd position	Who can install, replace, or use the item	5th position. Who determines disposition action on unserviceable items
		4th position	Who can do complete repair on the item	

NOTE

Complete Repair Maintenance capacity, capability, and authority to perform all corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item

Source Code The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follow.

Table 2. Source Code Explanation.

Source Code	Application/Explanation
PA PB PC PD PE PF PG PH PR PZ	Stock items, use the applicable NSN to requisition/request items with these source codes. They are authorized to the level indicated by the code entered in the third position of the SMR code.
	NOTE Items coded PC are subject to deterioration. Items coded PR or PZ are obsolete and may not be able to be ordered like other P coded items.
KD KF ■	Items with these codes are not to be requested/requisitioned individually. They are part of a kit that is authorized to the maintenance level indicated in the third position of the SMR code. The complete kit must be requisitioned and applied.
MF-Made at maintainer class MH-Made at below depot sustainment class ML-Made at SRA MD-Made at depot MG-Navy only	Items with these codes are not to be requisitioned/requested individually. They must be made from bulk material which is identified by the P/N in the DESCRIPTION AND USABLE ON CODE (UOC) entry and listed in the bulk material group work package of the RPSTL. If the item is authorized to you by the third position code of the SMR code, but the source code indicates it is made at higher level, order the item from the higher level of maintenance.

Table 2. Source Code Explanation – Continued.

Source Code	Application/Explanation
AF-Assembled by maintainer class	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the third position of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher level, order the item from the higher level of maintenance.
AH-Assembled by below depot sustainment class	
AL-Assembled by SRA	
AD-Assembled by depot	
AG-Navy only	
XA	Do not requisition an "XA" coded item. Order the next higher assembly. (Refer to NOTE below.)
XB	If an item is not available from salvage, order it using the CAGEC and P/N.
XC	Installation drawings, diagrams, instruction sheets, field service drawings, identified by manufacturer's P/N.
XD	Item is not stocked. Order an XD-coded item through local purchase or normal supply channels using the CAGEC and P/N given, if no NSN is available.

NOTE

Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes except for those items source coded "XA" or those aircraft support items restricted by requirements of AR 750-1.

Maintenance Code. Maintenance codes tell you the level(s) of maintenance authorized to use and repair support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

Third Position. The maintenance code entered in the third position tells you the lowest maintenance class authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to the following classes of maintenance:

Table 3. Maintenance Code Third Position.

Maintenance Code	Application/Explanation
C -	Crew
F -	Maintainer maintenance can remove, replace, and use the item.
H -	Below Depot Sustainment maintenance can remove, replace, and use the items.
L -	Specialized repair activity can remove, replace, and use the item.
G -	Afloat and ashore intermediate maintenance can remove, replace, and use the item (Navy only).
K -	Contractor facility can remove, replace, and use the item.
Z -	Item is not authorized to be removed, replaced, or used at any maintenance level.

Table 3. Maintenance Code Third Position – Continued.

Maintenance Code	Application/Explanation
D -	Depot can remove, replace, and use the item

NOTE

Army will use C in the third position. However, for joint service publications, other services may use O

Fourth Position The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance class with the capability to do complete repair (perform all authorized repair functions)

Table 4. Maintenance Code Fourth Position.

Maintenance Code	Application/Explanation
C -	Crew (operator) is the lowest class that can do complete repair
F -	Maintainer is the lowest class that can do complete repair of the item
H -	Below Depot Sustainment is the lowest class that can do complete repair of the item
L -	Specialized repair activity is the lowest class that can do complete repair of the item
D -	Depot is the lowest class that can do complete repair of the item
G -	Both afloat and ashore intermediate levels are capable of complete repair of item (Navy only)
K -	Complete repair is done at contractor facility
Z -	Nonreparable. No repair is authorized
B -	No repair is authorized. No parts or special tools are authorized for the maintenance of "B" coded item. However, the item may be reconditioned by adjusting, lubricating, etc., at the user level

Recoverability Code Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is shown in the fifth position of the SMR code as follows:

Table 5. Recoverability Code Fifth Position.

Recoverability Code	Application/Explanation
C -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the crew/operator level.
Z -	Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in the third position of SMR Code.
F -	Reparable item. When uneconomically repairable, condemn and dispose of the item at field level.
H -	Reparable item. When uneconomically repairable, condemn and dispose of the item at the below depot sustainment level.

Table 5. Recoverability Code Fifth Position – Continued.

Recoverability Code	Application/Explanation
D -	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item are not authorized below depot level.
L -	Reparable item. Condemnation and disposal not authorized below Specialized Repair Activity (SRA).
A -	Item requires special handling or condemnation procedures because of specific reasons (such as precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.
G-	Field level reparable item. Condemn and dispose at either afloat or ashore intermediate levels (Navy only).
K-	Reparable item. Condemnation and disposal to be performed at contractor facility.

NSN (Column (3)) The NSN(s) for the item is listed in this column.

CAGEC (Column (4)) The Commercial and Government Entity Code (CAGEC) is a five-digit code which is used to identify the manufacturer, distributor, or Government agency/activity that supplies the item.

PART NUMBER (Column (5)) Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE

When you use an NSN to requisition an item, the item you receive may have a different part number from the number listed.

DESCRIPTION AND USABLE ON CODE (UOC) (Column (6)) This column includes the following information:

1. The federal item name, and when required, a minimum description to identify the item.
2. Part numbers of any bulk materials required if the item is to be locally manufactured or fabricated.
3. **Hardness Critical Item (HCI)** Items that require special handling or procedures to ensure protection against electromagnetic pulse (EMP) damage are marked with the letters "HC."
4. Refer to Usable on Code details presented later in this work package under **SPECIAL INFORMATION**.
5. Dot indentions indicate the relationship of the part (or parts) to its next higher assembly (NHA) in the tabular listing. The NHA for this part (or parts) is listed right before the part (or parts) that it is the NHA for. If the item is connected directly to (can be disassembled from) the item identified in the functional group code title for that specific tabular listing, it shall have one dot indentation. Otherwise, that item in the tabular list will not have a dot indentation.
6. The statement **END OF FIGURE** appears below the last item description in column (6) for each Figure in the repair parts list, special tools repair parts, kits, bulk items, and special tools list work packages.

QTY (Column (7)) The QTY (quantity per Figure) column indicates the quantity of the item used in the breakout shown on the illustration/Figure. A "V" appearing in this column instead of a quantity indicates that the quantity is variable and quantity may change from application to application.

EXPLANATION OF CROSS-REFERENCE INDEXES WORK PACKAGES FORMAT AND COLUMNS

1. **National Stock Number (NSN) Index Work Package** NSNs in this index are listed in National Item Identification Number (NIIN) sequence.

STOCK NUMBER Column This column lists the NSN in NIIN sequence. The NIIN consists of the last nine digits of the NSN. When using this column to locate an item, ignore the first four digits of the NSN. However, the complete NSN should be used when ordering items by stock number.

For example, if the NSN is 5385-01-574-1476, the NIIN is 01-574-1476.

FIG. Column This column lists the number of the Figure where the item is identified/located. The Figures are in numerical order in the repair parts list and special tools list work packages.

ITEM Column This column identifies the item associated with the Figure listed in the adjacent FIG column. This item is also identified by the NSN listed on the same line.

2. **Part Number (P/N) Index Work Package** Part numbers which are all numbers are listed first in ascending numeric sequence. Part numbers containing letters and numbers are listed in ascending alphanumeric sequence by part number after all the part numbers containing numbers only.

PART NUMBER Column This column indicates the part number assigned to the item.

FIG. Column This column lists the number of the Figure where the item is identified/located in the repair parts list and special tools list work packages.

ITEM Column The item number is the number assigned to the item as it appears in the Figure referenced in the adjacent Figure number column.

SPECIAL INFORMATION

UOC The UOC appears in the lower left corner of the Description Column heading. Usable on codes are shown as "UOC" in the Description Column (justified left) on the first line under the applicable item/nomenclature. Uncoded items are applicable to all models. Examples of the UOCs used in the RPSTL are:

Table 6. Usable On Codes.

Code	Used On
BSA	Bradley Fire Support Team Vehicle M7 BFIST SA

Fabrication Instructions Bulk materials required to manufacture items are listed in the bulk material work package of this RPSTL. Part numbers for bulk material are also referenced in the Description Column of the line item entry for the item to be manufactured/fabricated. Detailed fabrication instructions for items source coded to be manufactured or fabricated are found in Illustrated List of Manufactured Items (TM 9-2350-439-23).

Index Numbers Items which have the word BULK in the Figure column will have an index number shown in the item number column. This index number is a cross-reference between the NSN/Part Number (P/N) Index work packages and the bulk material list in the bulk items work package.

Associated Publications

Table 7. Associated Publications.

Publication	Title

HOW TO LOCATE REPAIR PARTS

1. When NSNs or Part Numbers Are Not Known

First Using the table of contents, determine the assembly group to which the item belongs. This is necessary since Figures are prepared for assembly groups and subassembly groups, and lists are divided into the same groups.

Second Find the Figure covering the functional group or the sub functional group to which the item belongs.

Third Identify the item on the Figure and note the number(s).

Fourth Look in the repair parts list work packages for the Figure and item numbers. The NSNs and part numbers are on the same line as the associated item numbers.

2 When NSN is Known

First If you have the NSN, look in the STOCK NUMBER column of the NSN index work package. The NSN is arranged in NIIN sequence. Note the Figure and item number next to the NSN.

Second Turn to the Figure and locate the item number. Verify that the item is the one for which you are looking.

3 When Part Number is Known

First If you have the part number and not the NSN, look in the PART NUMBER column of the part number index work package. Identify the Figure and item number.

Second Look up the item on the Figure in the applicable repair parts list work package.
